Hey Tom, can you generate the formatted report for the 4 samples taken on 8/7/15 and send it on over? (the report that looks like the one attached)

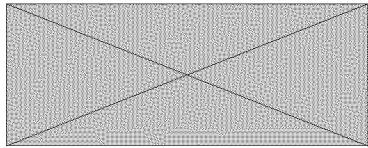

Thanks

The EDD reported to PQL, are we supposed to be reporting to Sample Detection Limit (SDL)? Method Detection Limit (MDL)? PQL? The ESAT data reported to what looks like MDL but could be SDL. Material from Region 8 reported SDL, although it appeared as the MDL in the reports.

As I usually load data the Analysis (Metals, total or Metals, Dissolved) would have to be included to separate the dissolved results from the total results. My way is due to the way EnviroData handles it. Some labs say "analyte" others say "Analyte, Dissolved" or "Analyte,

Total". We need to be consistent. How do you want analyte names loaded, i.e. "Iron"; or "Iron, Dissolved" and Iron, Total"

No. We set the lab up last Friday on the fly. The lab was not provided an EDD format from Region 6 until Saturday if I remember correctly and they asked whether their standard EDD format was acceptable for the first sample shipment that arrived on Saturday. I said yes. On Monday we can have the lab create any format you need for the project when their IT staff is in.

Per our meeting today, the data management team needs to establish the EDD format. Hopefully all 3 regions can use the same EDD format. Janine and crew will have to communicate what you need from the lab and talk with them directly.

Was this supposed to be SCRIBE EDD format?

Hey Janine, we've got prelim results from Region 6 Friday's samples (8/7/15) (Attached)

Not sure who you were going to have load this, but I copied Tom and Corey.
